Subject index for papers in Volume 33

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any. Communications are identified by (C).

Subject	Author	Page
Algorithms		
Preserving the integrity of cyclic-redundancy checks when protected text is intentionally altered	Irvin	618
Analytical methods		
Dependability evaluation of a class of multi-loop topologies for local area networks	Smith	511
Statistical properties of selected recording codes	Howell	60
APL programs		
Fault-simulation programs for integrated-circuit yield estimations (C)	Stapper	647
Representing knowledge with functions and Boolean arrays	Fordyce	627
Channel coding		
Coding for constrained channels: A comparison of two approaches	Franaszek	602
Chip design		
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip	Matick	524
Coding theory		
Statistical properties of selected recording codes	Howell	60
Two-level coding for error control in magnetic disk storage products	Patel	470
Computer applications		
Modeling and image processing for visualization of volcanic mapping	Pareschi	406
Representing knowledge with functions and Boolean arrays	Fordyce	627
Translating object specifications into a computer-generated three-dimensional graphic to be reproduced as a high efficiency, reflection photo-polymer hologram suitable for mass-production (C)	Molteni	178
Two-level coding for error control in magnetic disk storage products	Patel	470
Computer performance analysis		
Analysis of block-paging strategies	Tetzlaff	51
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip	Matick	524
Conjugate-gradient subroutines for the IBM 3090 Vector Facility	Radicati	125
Functional cache chip for improved system performance	Matick	15
Lattice-gas hydrodynamics on the IBM 3090 Vector Facility	Succi	136
Condensed-matter physics		
Effects of quasiperiodic (Penrose tile) symmetry on the eigenvalues and eigenfunctions of the wave equation	He	456
Disk files		
Two-level coding for error control in magnetic disk storage products	Patel	470
Disk drives: Heads—mechanical analysis		
The dynamics of slider bearings during contacts between slider and disk	Benson	2
Domain theory		
Order in the domain structure in soft-magnetic thin-film elements: A review	van den Berg	540

Error detection and correction
Preserving the integrity of cyclic-redundancy checks when protected text is intentionally altered — Irvin 618
Two-level coding for error control in magnetic disk storage products — Patel 470

Error recovery
Two-level coding for error control in magnetic disk storage products — Patel 470

Electromagnetic interference
Modeling electromagnetic interference properties of printed circuit boards — Paul 33

Fault-tolerant systems
Large-area fault clusters and fault tolerance in VLSI circuits: A review — Stapper 162
Small-area fault clusters and fault tolerance in VLSI circuits (C) — Stapper 174

Femtosecond laser studies
Femtosecond laser studies of the relaxation dynamics of semiconductors and large molecules — Tang 447

Films
Translating object specifications into a computer-generated three-dimensional graphic to be reproduced as a high efficiency, reflection photo-polymer hologram suitable for mass-production (C) — Molteni 178

Graphics
Translating object specifications into a computer-generated three-dimensional graphic to be reproduced as a high efficiency, reflection photo-polymer hologram suitable for mass-production (C) — Molteni 178

High-performance cache chips
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip — Matick 524

High-temperature superconductivity
A new structural modification of superconducting $La_{2-x}M_xCuO_4$ — Axe 382
A review of elastic properties of high-T_c superconductors and some related C_p results — Fossheim 365
Critical current measurements in single crystals and single-grain boundaries in $YBa_2Cu_3O_7$ films — Chaudhari 299
Critical temperature and the Ginzberg–Landau theory on layered high-temperature superconductors — Schneider 351
Current understanding of electronic structure and some difficulties with cuprate semiconductors — Kitazawa 201
Electronic structure studies of high-T_c superconductors by high-energy spectroscopies — Fink 372
Energy dependence of the Andreev reflection of $YBa_2Cu_3O_{7-\delta}$ — van Kempen 389
Glassy behavior of high-T_c superconductors — Morgenstern 307
Granular Josephson and quantum interference effects in HTC ceramic superconductors — Gough 262
High-T_c superconductivity in bismuthates—How many roads lead to high T_c? — Batlogg 208
Infrared studies of the normal and superconducting states of $Y_1Ba_2Cu_3O_7$ — Collins 238
Instability and high-T_c superconductivity — Kataoka 356
Interim report on the charge-transfer resonance model for the Cu–O superconductors — Varma 215
Low-field microwave absorption in single-crystal superconducting $YBa_2Cu_3O_{7-\delta}$ — Blazey 324
Magnetic frustration model and superconductivity in doped planar CuO_2 systems — Aharony 287
Measurements on thin-film high-T_c superconductors — Kapitulnik 252
Memory effects in $YBa_2Cu_3O_{7-\delta}$ single crystal — Rossel 328
Muon-spin rotation experiments in high-T_c superconductors and related materials — Keller 314
NMR study of magnetism and superconductivity in high-T_c oxides — Kitaoka 277
Nuclear magnetic resonance in high-T_c superconductors — Mehring 342
On the nature of high-temperature superconductivity — Emery 246
Oxygen "disorder" and the structures of high-T_c superconductors by neutron powder diffraction — Hewat 220
Positron annihilation and high-temperature superconductivity — Peter 333
Quasi-elastic and inelastic neutron-scattering studies of superconducting $La_{2-x}Sr_xCuO_4$ — Birgeneau 270
Short-coherence-length superconductors — Deutscher 293
Tl–Ca–Ba–Cu–O superconducting oxides — Beyers 228

Image processing
Modeling and image processing for visualization of volcanic mapping — Pareschi 406

Information theory
Coding for constrained channels: A comparison of two approaches — Franaszek 602

Integrated-circuit chip problem
Fault-simulation programs for integrated-circuit yield estimations (C) — Stapper 647
Large-area fault clusters and fault tolerance in VLSI circuits: A review — Stapper 162
Small-area fault clusters and fault tolerance in VLSI circuits (C) — Stapper 174

Integrated-circuit design
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip — Matick 524

Local area networks
Dependability evaluation of a class of multi-loop topologies for local area networks — Smith 511
Preserving the integrity of cyclic-redundancy checks when protected text is intentionally altered — Irvin 618

Logic circuit testing
A method for generating weighted random test patterns — Waicukauski 149

M-dimensional time series
Time series in *M* dimensions: The power spectrum — Yetzer 464

Magnetic domains in thin films
Order in the domain structure in soft-magnetic thin-film elements: A review — van den Berg 540

Materials
Effects of quasiperiodic (Penrose tile) symmetry on the eigenvalues and eigenfunctions of the wave equation — He 456

Mathematics (applied)
Geometric tolerancing: I. Virtual boundary requirements — Jayaraman 90
Geometric tolerancing: II. Conditional tolerances — Srinivasan 105
Time series in *M* dimensions: The power spectrum — Yetzer 464

Mechanical engineering
Matrix print actuator for dot band printer — Zable 609

Memory design and technology
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip — Matick 524

Memory management
Architecture, design, and operating characteristics of a 12-ns CMOS functional cache chip — Matick 524
Functional cache chip for improved system performance — Matick 15

Models and modeling
Modeling and image processing for visualization of volcanic mapping — Pareschi 406
Translating object specifications into a computer-generated three-dimensional graphic to be reproduced as a high efficiency, reflection photo-polymer hologram suitable for mass-production (C) — Molteni 178

Networks
Dependability evaluation of a class of multi-loop topologies for local area networks — Smith 511
Preserving the integrity of cyclic-redundancy checks when protected text is intentionally altered — Irvin 618

Nonequilibrium carriers in GaAs
Femtosecond laser studies of the relaxation dynamics of semiconductors and large molecules — Tang 447

Object-oriented programming
Frames, semantic networks, and object-oriented programming in APL2 — Alfonseca 502

Optical spectroscopy
Femtosecond laser studies of the relaxation dynamics of semiconductors and large molecules — Tang 447

Paging
Analysis of block-paging strategies — Tetzlaff 51

Performance measurement and prediction
Analysis of block-paging strategies — Tetzlaff 51

Printed circuit board modeling
Modeling electromagnetic interference properties of printed circuit boards — Paul 33

Programming and programming languages
Frames, semantic networks, and object-oriented programming in APL2 — Alfonseca 502
Representing knowledge with functions and Boolean arrays — Fordyce 627

Quasiperiodic symmetry
Effects of quasiperiodic (Penrose tile) symmetry on the eigenvalues and eigenfunctions of the wave equation — He 456

Reliability
Dependability evaluation of a class of multi-loop topologies for local area networks — Smith 511

Semantics of programming languages
Frames, semantic networks, and object-oriented programming in APL2 — Alfonseca 502
Representing knowledge with functions and Boolean arrays — Fordyce 627

Simulation
Modeling and image processing for visualization of volcanic mapping — Pareschi 406

Solid modeling
Geometric tolerancing: I. Virtual boundary requirements — Jayaraman 90
Geometric tolerancing: II. Conditional tolerances — Srinivasan 105
Natural quadrics: Projections and intersections — O'Connor 417

Statistics
Statistical properties of selected recording codes — Howell 60

System memory performance
Functional cache chip for improved system performance — Matick 15

Telecommunications
Preserving the integrity of cyclic-redundancy checks when protected text is intentionally altered — Irvin 618

Superconductivity
A new structural modification of superconducting $La_{2-x}M_xCuO_4$ — Axe 382
A review of elastic properties of high-T_c superconductors and some related C_p results — Fossheim 365
